

2018 Grass Fed Beefalo Order Form

All orders are pre-sale and a deposit is required to hold any order. Payment for deposit and final payment can be made by cash, check, or credit card (2% discount on balance for cash or check). Processing takes place around Sept/Oct and the prices listed are for 2018 fall delivery. Final payment is due at time of pick-up.

1/2 of a beefalo averages 275 - 375 pounds hanging weight. The hanging weight is at time of kill, prior to cutting, deboning and trimming. The finished weight is approximately 60% to 75% of the hanging weight, depending on your cut and wrap instructions. **All charges are at the hanging weight. The final cost owed by customer will be calculated after animal has been sent to processor.** We will contact you with the final cost prior once we know the final weight.

We will deliver the live animal to a clean and USDA approved processor where your beefalo will dry age for 21 days. The carcass will be labeled with your name and will be processed according to the custom cutting instructions you provide. Final price below includes all costs, including processing, transport, brand inspection, and delivery fees (within a 30 mile radius of Tri-Cities). Please keep in mind that meat will lose weight/volume during the aging process.

If you need help deciding how to get your meat cut, please call us. Your order will arrive in the Tri Cities frozen. Once we have a firm date on fall processing, we will be in contact with you to discuss delivery day.

DEPOSIT IS NON-REFUNDABLE *Deposit will be returned should the unforeseen happen between deposit and processing

PLEASE CIRCLE AMOUNT OF BEEFALO AND TYPE OF WRAP			
Quantity of Beefalo	Price per pound Calculated at hanging weight paper wrapped	Price per pound Calculated at hanging weight cryovac	Deposit required
